

TATA STEEL

Colorsteels service centre

UK's leading distributor of pre-finished steel

UNRIVALLED PRODUCT, PROCESSING AND TECHNICAL RESOURCES

Colorsteels service centre

Colorsteels is Tata Steel's leading UK service centre for pre-finished steel. This position has been built on our 'yes we can' philosophy and unrivalled product, processing and technical resources. Enabling us to provide pre-finished steel solutions tailored to the precise needs of your business.

With over 40 years' experience of developing, processing and distributing pre-finished steel to the construction, manufactured goods and domestic appliance sectors we have cemented our position as the UK's premier pre-finished steel distributor. We supply the full range of Tata Steel's Colorcoat® products for the construction industry, Advantica® for the manufactured goods sector and Motiva® for the domestic appliance sectors.

We are committed to supplying innovative material solutions that add real value to customers' businesses, no matter how large, small or specialised the requirement. As part of Tata Steel we can provide tailored product and service solutions.

Sustainable approach

Shotton Works, Deeside, North Wales is home to the Colorsteels service centre. It is also where our Colorcoat® pre-finished steel, building envelope and flooring products are manufactured.

Surrounded by the Dee Estuary the site balances industrial manufacturing with a sustainable approach to its operations. The reduction of greenhouse gas emissions, minimising resource waste and water usage, the encouragement of nature conservation and community engagement, have all contributed to the achievement of BES 6001 Responsible Sourcing standard.

Tata Steel

Tata Steel is Europe's second largest steel producer. Our comprehensive range of high quality products and services are supported by steel making sites in the UK and The Netherlands, a European-wide distribution and service centre network and downstream businesses ranging from tubes and building systems to plating.

Our approach to business is unique. We believe our strength is how we build collaborative relationships that create new success for our customers, adding value to their business and helping them to perform in their markets. As a company, we are dedicated to managing our operations responsibly and to continuously improving our performance. We operate in a way that is safe for our people and which respects the environment, with care towards the communities surrounding our operations and beyond.

High quality processing and service

We are committed to service excellence in line with our customer expectations and ensuring close working partnerships – no matter how large, small or specialised your requirements. Our experienced account teams are trained to ensure that we provide you with the best service possible.

You can be confident of excellent service from Colorsteels because:

- We hold 130 different construction product lines in small quantities reducing the need for you to hold stock.
- We stock the widest range of Colorcoat® pre-finished steel, including the full colour range of branded products.
- We offer next day delivery service on our Colorcoat® FastPak standard stock packs and 48 hour delivery on bespoke processed non-standard lengths and an even wider range of colours.
- We are the only approved source of flat sheets for all Platinum® Plus projects.
- We meet the Tata Steel standard for processing, handling, storage, availability and delivery, in order to provide the best product and services to customers.
- We are approved to BS EN ISO 9001/2015 and BS EN ISO 14001/2015 for quality and environmental management systems and health and safety standard OHSAS 18001/2007.
- All Colorcoat® products are certified to the Building Research Establishment's BES 6001 responsible sourcing standard, guaranteeing full traceability of your purchases.

Technical support

As part of Tata Steel we have access to technical experts and research facilities to provide you with support and advice on product application, steel grades, fabrication methods, welding, coating performance and help in choosing the right products for the right applications.

Service you can rely on

Our technical knowledge and support ensures the most exacting detailed customer specifications are transferred into achieving the quality expected by our customers.

Quality standards for length, width, squareness, diagonals and shape give assurance for manufacturing processes using automated press lines, panel manufacture, roll forming and CNC equipment.

We achieve high aesthetical standards. Understanding our customers and their requirements is critical in ensuring that visual appearance and flatness criteria are met for even the most demanding construction projects, appliances or fittings in kitchens and bedrooms.

The widest range of colours with market leading guarantees

130 products available in small quantities on short lead times

Based at Shotton, North Wales, our Colorsteels service centre is uniquely positioned on the same site where we manufacture our Colorcoat® pre-finished steel products. This allows us to offer the widest stock of Colorcoat® products on short lead times, enabling our customers to source a complete Colorcoat® building envelope, including fabrications and small colour quantities.

Our available products include:

- Colorcoat HPS200 Ultra®
- Colorcoat Prisma®
- Colorcoat® LG
- Colorcoat® PE15 (liner)
- Colorcoat® PE25
- Colorcoat® PVDF (PVF2)
- Ruralclad®
- Colorfarm®
- Colorcoat Aquatite®

The storage, handling, processing and range of Colorcoat® pre-finished steel products have been assessed and found to meet the highest standard of quality and service for supply into the construction market sector.

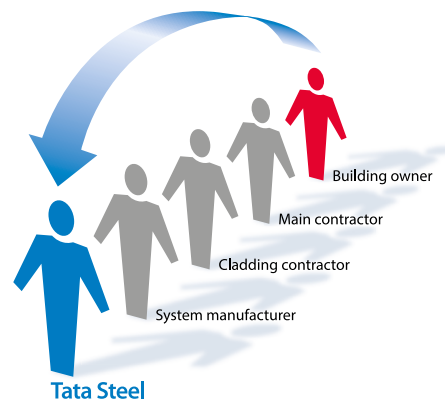

Market leading guarantees

The market leading Confidex® Guarantee is exclusively available for Colorcoat® products including flashings. Confidex® offers a guarantee of up to 40 years upon registration, for roofs and walls, including flashings of industrial and commercial buildings.

You can register for your Confidex® Guarantee on your flashings at the same time you register your other products. This can be done online or through our team, just supply the building project details at the time of ordering.

Confidex® provides a direct guarantee from Tata Steel

All Platinum® Plus projects are automatically registered through our building system business at the point of supply, this includes the pre-finished steel Confidex® Guarantee registration.

We will also provide a 25 year warranty statement for Colorcoat® LG flashings (subject to registration).

Rainwater management products for building applications

Colorcoat Aquatite® products have been developed specifically for rainwater applications in buildings, offering an unbeatable combination of a strong, formable metal substrate combined with a non-permeable weather resistant membrane factory-bonded to the water-carrying surface. This highly effective construction gives a superior quality finish for maximum drainage efficiency. Plus, it comes with the reassurance of a leading guarantee for 25 years and technical back-up.

Colorcoat Aquatite® is suitable for a wide range of rainwater applications including valley gutters, flashings, roofing and parapet copings. Benefits include:

- Comprehensive 25 year guarantee.
- Available in a smooth and slip resistant emboss.
- Slip resistant emboss passes BS 7976-2 slip test both wet and dry.
- Robust, highly durable 1.2mm PVC membrane bonded to 1.2mm or 1.5mm steel.
- Available in 3 different widths.
- Simple and easy to fabricate. Can be trafficked normally during construction and maintenance.
- Available on 24 hour lead time in a range of standard sizes.
- PVC membrane can easily be hot air welded or chemically bonded.
- Compatible with all other PVC membranes; can be joined to any plastisol product.
- Supplied on a high performance hot dip galvanized substrate to BS EN 10147.
- Available in both the integral overhang membrane or without for butt strap welding methods.
- Approved for use with the Platinum® Plus system guarantee.
- Standard colour: Grey.

Products for manufactured goods and domestic appliances

Our tightly controlled processing services ensure that we meet our customer's requirements for shape, flatness, dimensional tolerances, aesthetics and packing.

We are a major supplier of pre-finished steel and laminated steel products designed specifically to meet the extremely demanding conditions required for applications including:

- Domestic appliance manufacturing.
- Office furniture and storage units.
- Lighting solutions and lighting management.
- Heating, ventilation and air conditioning.
- Cold store and food safe applications.
- Clean rooms.
- Doors and windows.

We offer our processing services for the following product ranges from Tata Steel:

Advantica®

A range of pre-finished steels specifically designed to meet the demands of manufactured goods processing route such as pressing, bending, punching and drawing steel.

Motiva®

Pre-finished steel to meet the needs of market leading producers for the manufacture of hot, cold and wet domestic appliances.

We understand your requirements for quality, service and a supply management process which allows you to minimise waste and efficiently manage the performance of your supply chain. Our technical teams are able to support your business by assessing the specific properties required for your end application, we will then recommend the best product to meet the needs of your business.
