

Construction Design and Management Regulations
 Design risk assessments are carried out throughout the design stages of the project in accordance with company procedures and research. These assessments provide an overview of the applicable design and use of the construction to be undertaken and the associated risks to the project. The design team will ensure that the project meets all applicable regulations and standards. The design team will ensure that the project meets all applicable regulations and standards. The design team will ensure that the project meets all applicable regulations and standards.
