

Tata Steel retain the right to amend the construction and technical specifications shown on this drawing without prior notice.

The window frame can be delivered and installed alongside the Trimapanel® allowing the elevation to be completed without delay.

The window can be fitted from the inside at a later date, providing flexibility and time savings to the build program.

Framing clips and seals secure the window in place. These sections can be removed to allow replacement of the glazing element.

All support steelwork by others
